categorizing Vote_Average column

Man

We would cut the Vote_Average values and make 4 categories: popular average below_avg not_popular to describe it more using catigorize_col() function provided above.

```
In [37]:
         def catigorize_col (df, col, labels):
             catigorizes a certain column based on its quartiles
             Args:
                       df - dataframe we are proccesing
                (df)
                        str - to be catigorized column's name
                (labels) list - list of labels from min to max
             Returns:
                       df - dataframe with the categorized col
                (df)
            # setting the edges to cut the column accordingly
                    = [df[col].describe()['min'],
            df[col].describe()['25%'],
                                         df[col].describe()
                                   df[col].describe()['75%'],
            ['50%'],

Now that our dataset is clean and tidy, we are left with a total of 6 columns and 25551 rows to dig into during our analysis

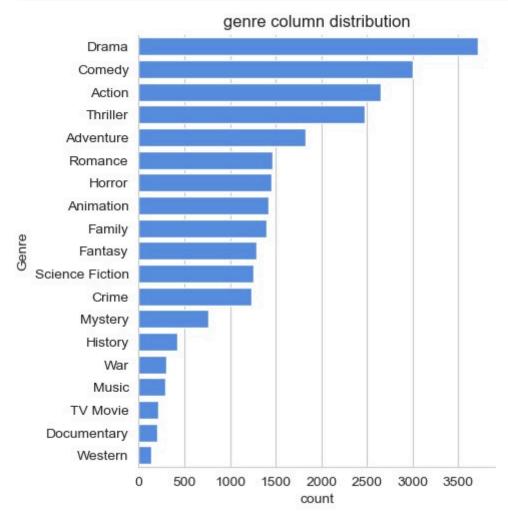

Data Visualization

here, we'd use Matplotlib and seaborn for making some informative visuals to gain insights abut our data.

```
In [62]: # setting up seaborn configurations
sns.set_style('whitegrid')
```

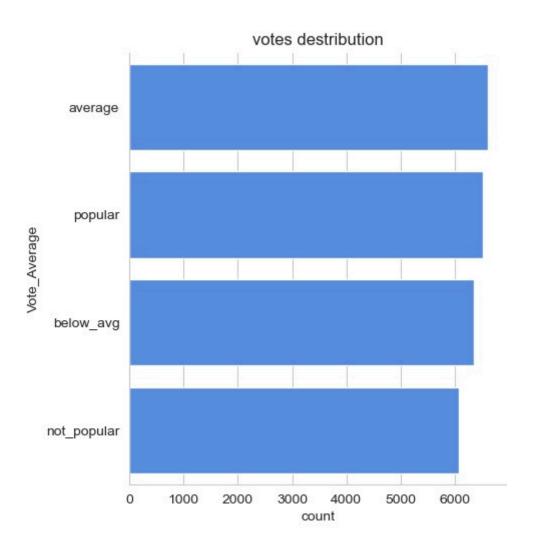

Q1: What is the most frequent genre in the dataset?

```
In [65]: # showing stats. on genre column
df['Genre'].describe()
```

 we can notice from the above visual that Drama genre is the most frequent genre in our dataset and has appeared more than 14% of the times among 19 other genres.

Q2: What genres has highest votes ?

Q3: What movie got the highest popularity? what's its genre?

in [74]:	<pre># checking max popularity in dataset df[df['Popularity'] == df['Popularity'].max()]</pre>								
ut[74]:	Rele	ease_Date	Title	Popularity	Vote_Count	Vote_Average	Genre		
	0	2021	Spider-Man: No Way Home	5083.954	8940	popular	Action		
	1	2021	Spider-Man: No Way Home Spider-Man:	5083.954	8940	popular	Adventure		
	2	2021	No Way Home	5083.954	8940	popular	Science Fiction		

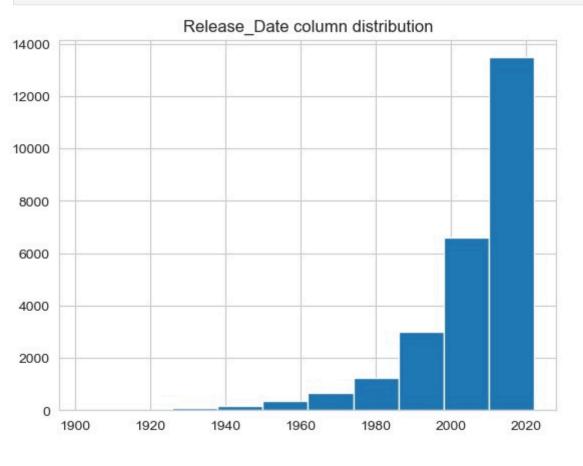

Q4: What movie got the lowest popularity? what's its genre?

```
In [86]: # checking max popularity in dataset
df[df['Popularity'] == df['Popularity'].min()]
```

	Release_Date	Title	Popularity	Vote_Count	Vote_Average	Genre
25546	2021	The United States vs. Billie Holiday	13.354	152	average	Music
25547	2021	The United States vs. Billie Holiday	13.354	152	average	Drama
25548	2021	The United States vs. Billie Holiday	13.354	152	average	History
25549	198	Threads	13.35	18	popular	War
25550	4	Threads	4	6	popular	Drama
25551	1984 4	Threads	13:35 ₄	1 86	popular	Science Fiction

Q5: Which year has the most filmmed movies?

```
df['Release_Date'].hist()
In [82]: plt.title('Release_Date column distribution')
plt.show()
```

Conclusion

Out[86]:

Q1: What is the most frequent genre in the dataset?

Drama genre is the most frequent genre in our dataset and has appeared more than 14% of the times among 19 other genres.

Q2: What genres has highest votes?

we have 25.5% of our dataset with popular vote (6520 rows). Drama again gets the highest popularity among fans by being having more than 18.5% of movies popularities.

Q3: What movie got the highest popularity? what's its genre?

Spider-Man: No Way Home has the highest popularity rate in our dataset and it has genres of Action, Adventure and Sience Fiction.

Q3: What movie got the lowest popularity? what's its genre?

The united states, thread' has the highest lowest rate in our dataset and it has genres ofmusic,drama, 'war', 'sci-fi' andhistory`.

Q4: Which year has the most filmmed movies?

year 2020 has the highest filmming rate in our dataset.
